3

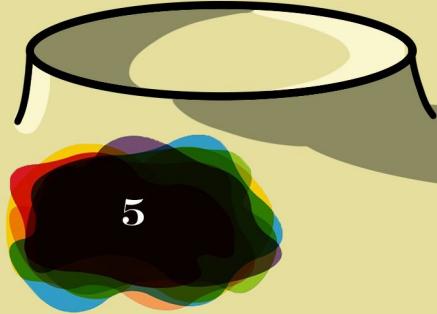

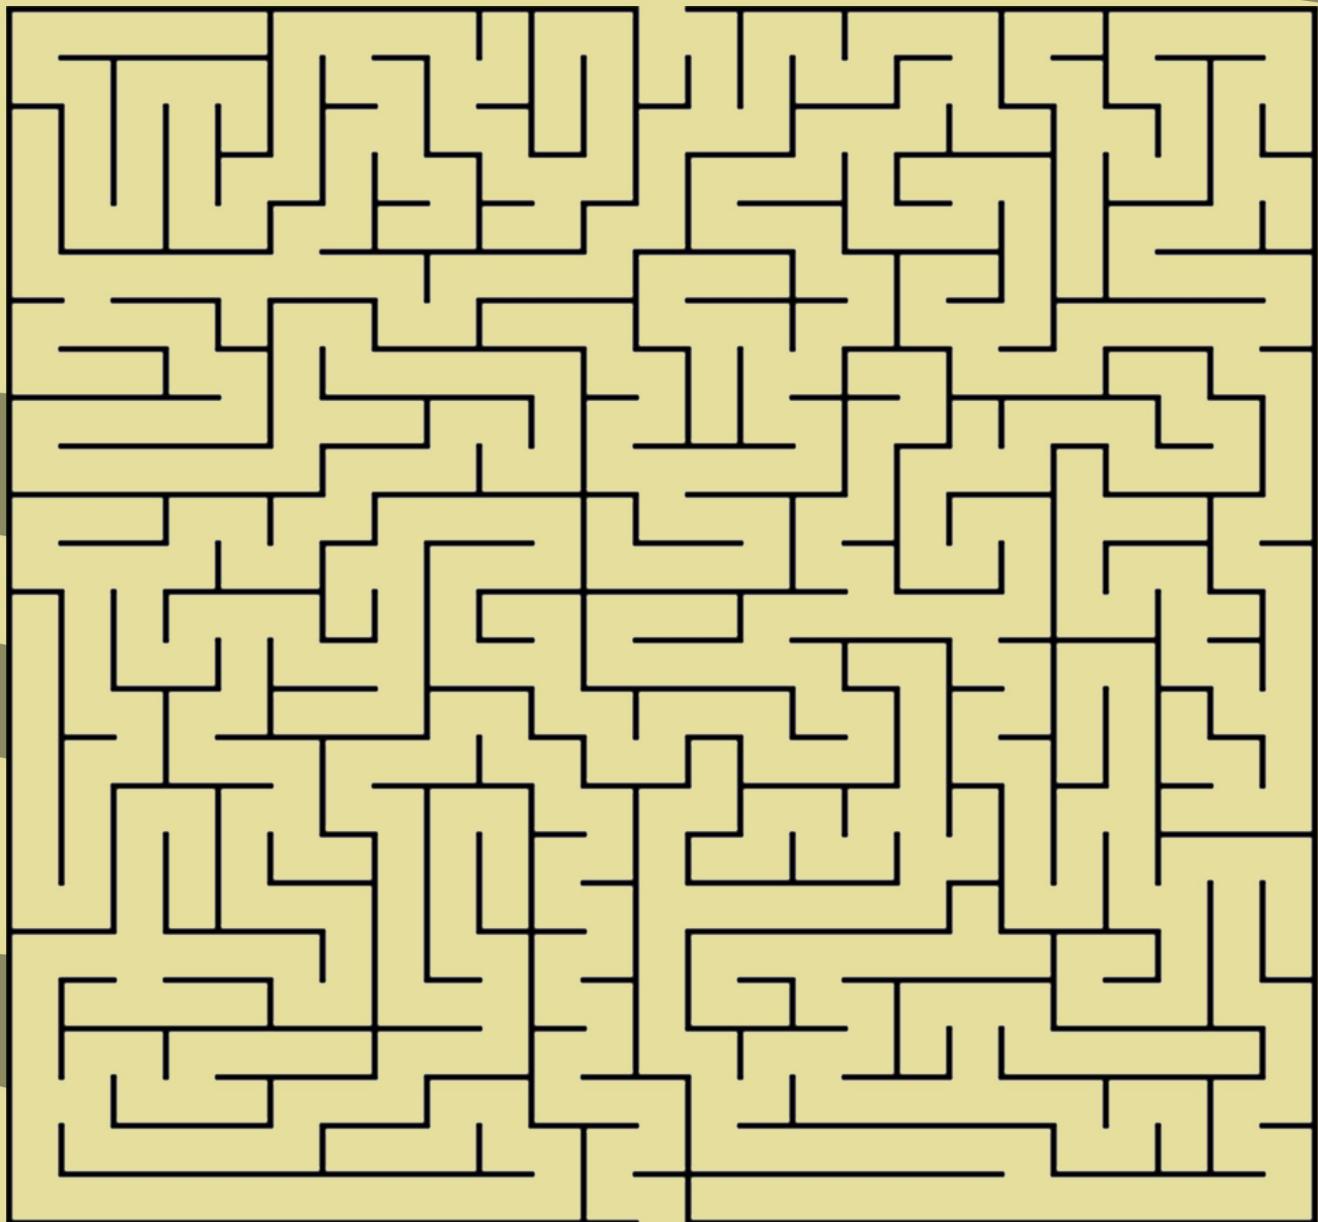

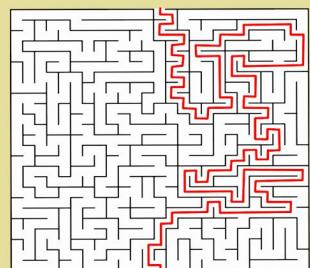

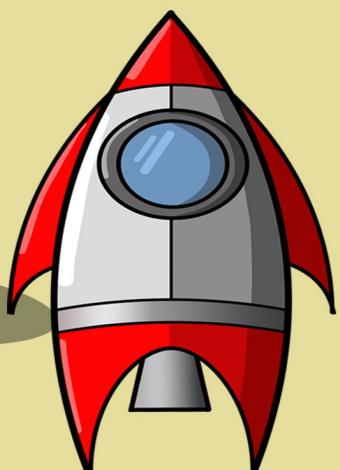

Moon Maze

Can you help Anna The Astronaut get through the maze? She needs to reach the rocket on the other side so she can get back to Earth.

5

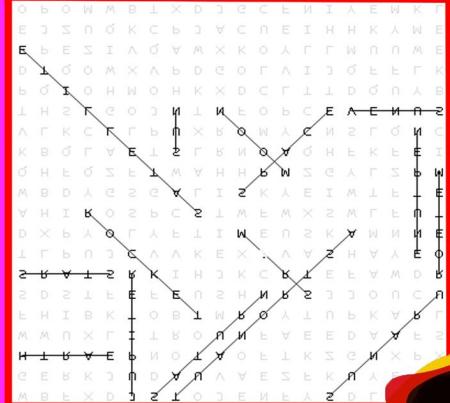

Word Search.

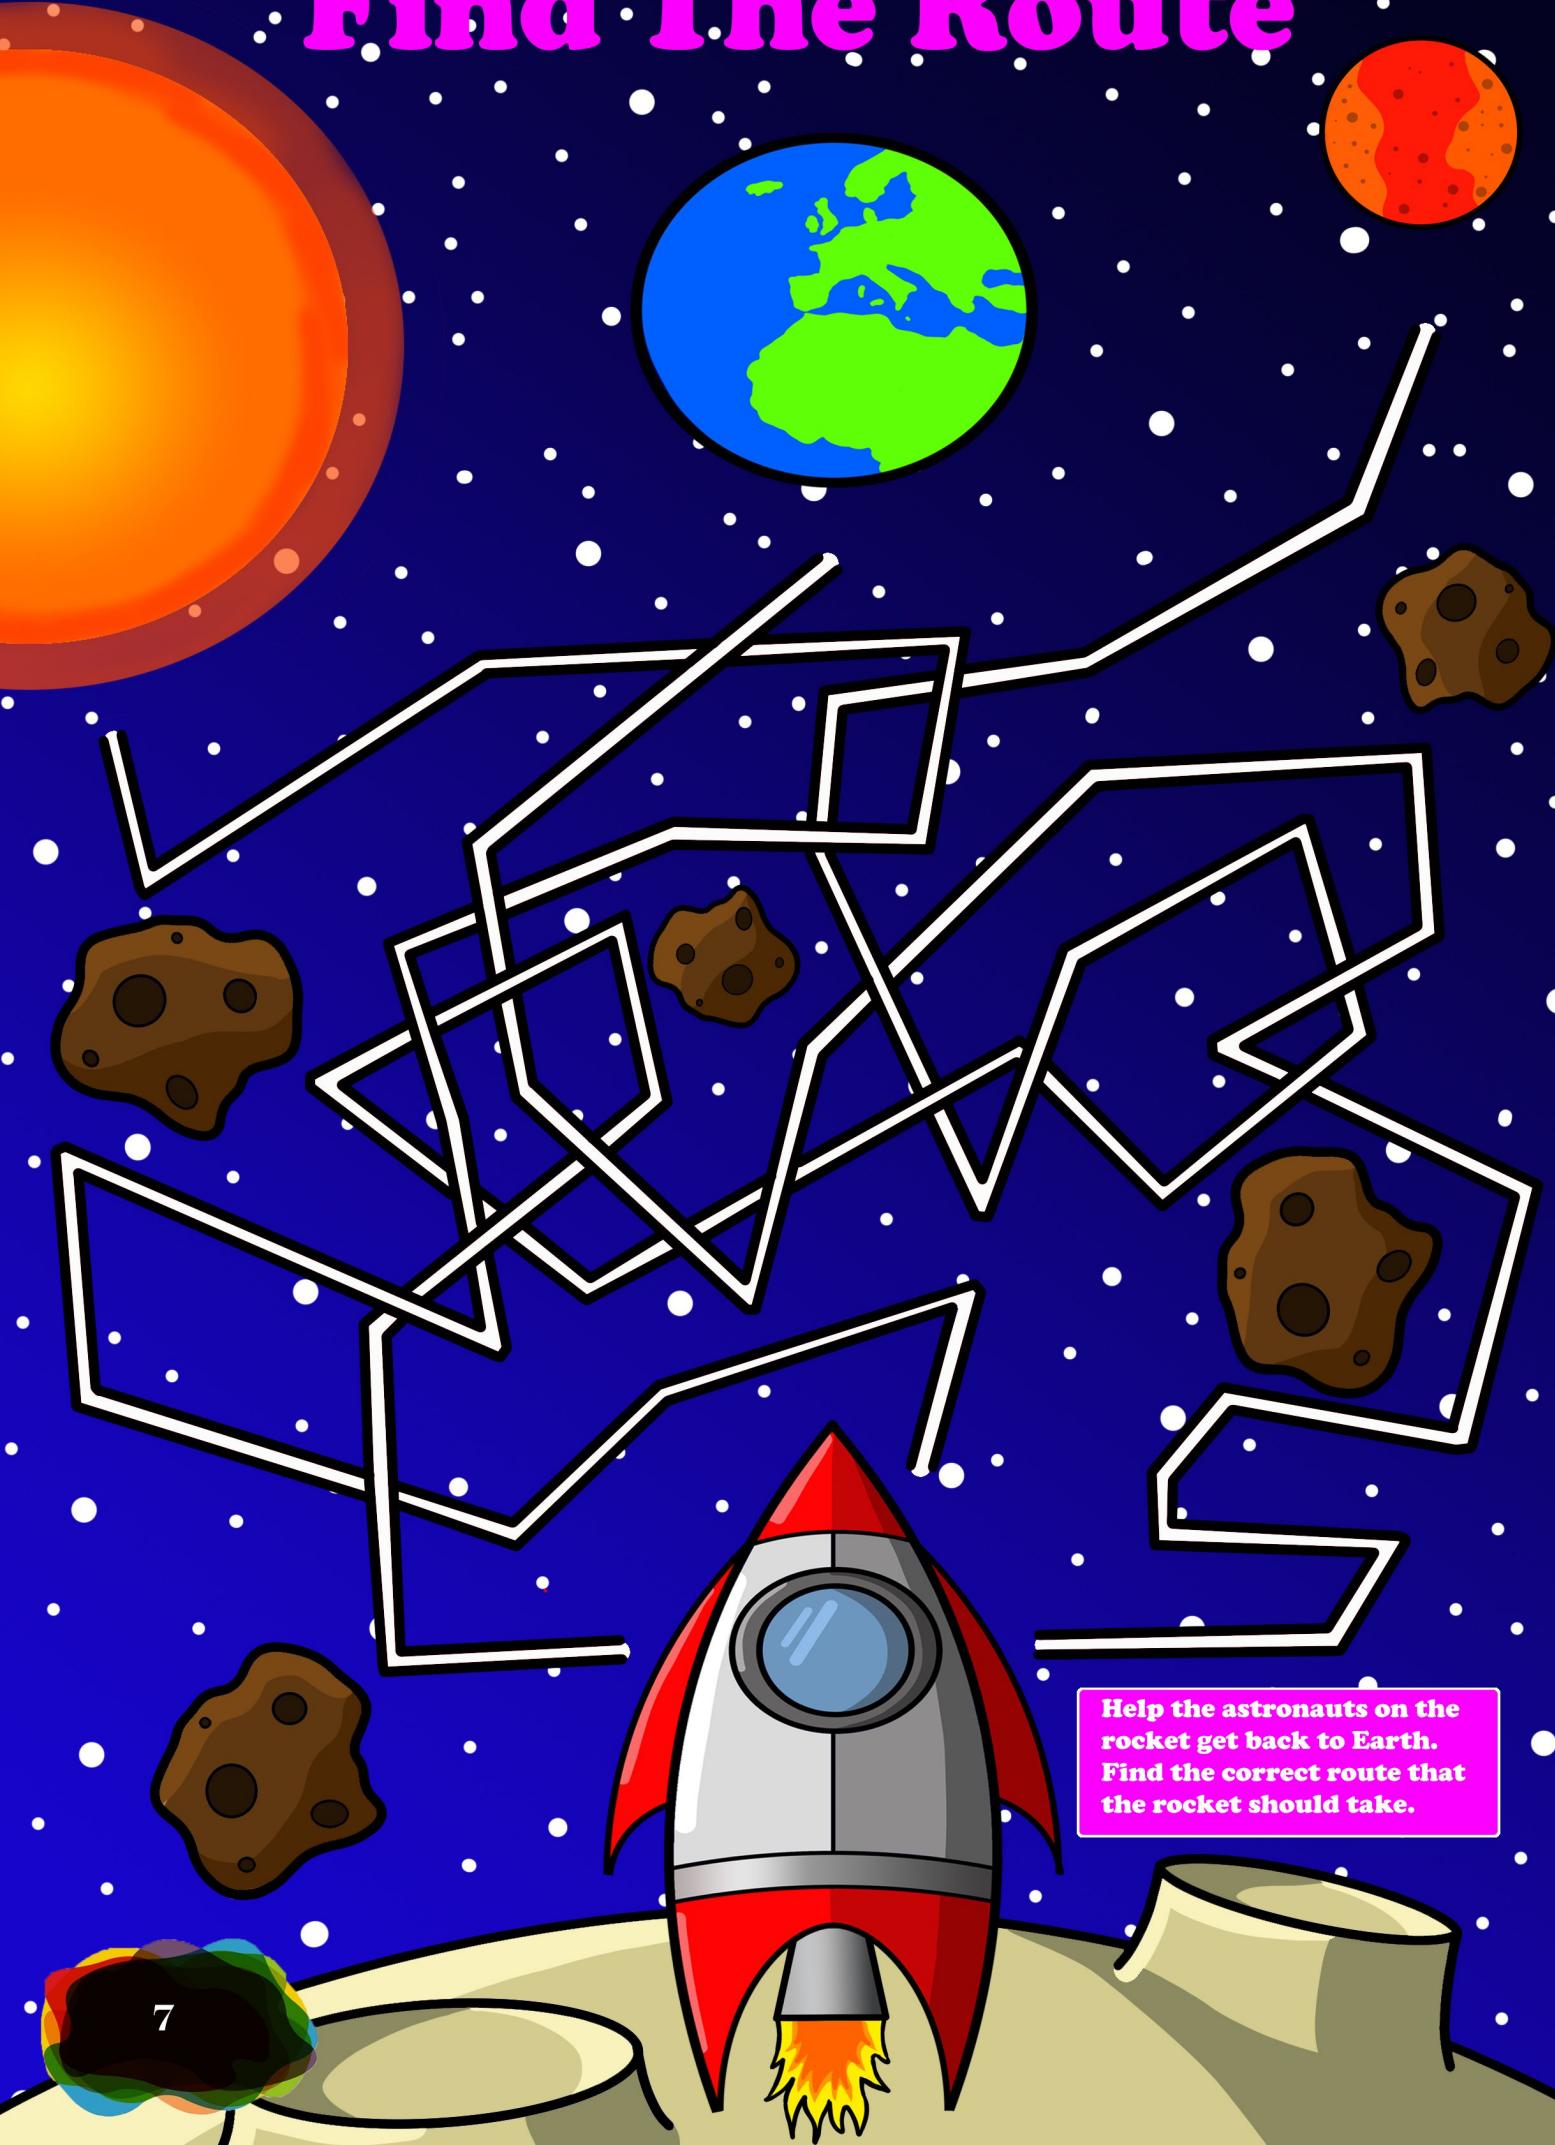

Find the words that are listed below. The words can be across, up and down, or diagonal. Some may even be backwards. Look Carefully.
Answers can be found on the bottom right.

Astronaut	Earth	Jupiter
Mars	Meteor	Moon
Neptune	Rocket	Satellite
Saturn	Space	Stars
Sun	Uranus	Venus

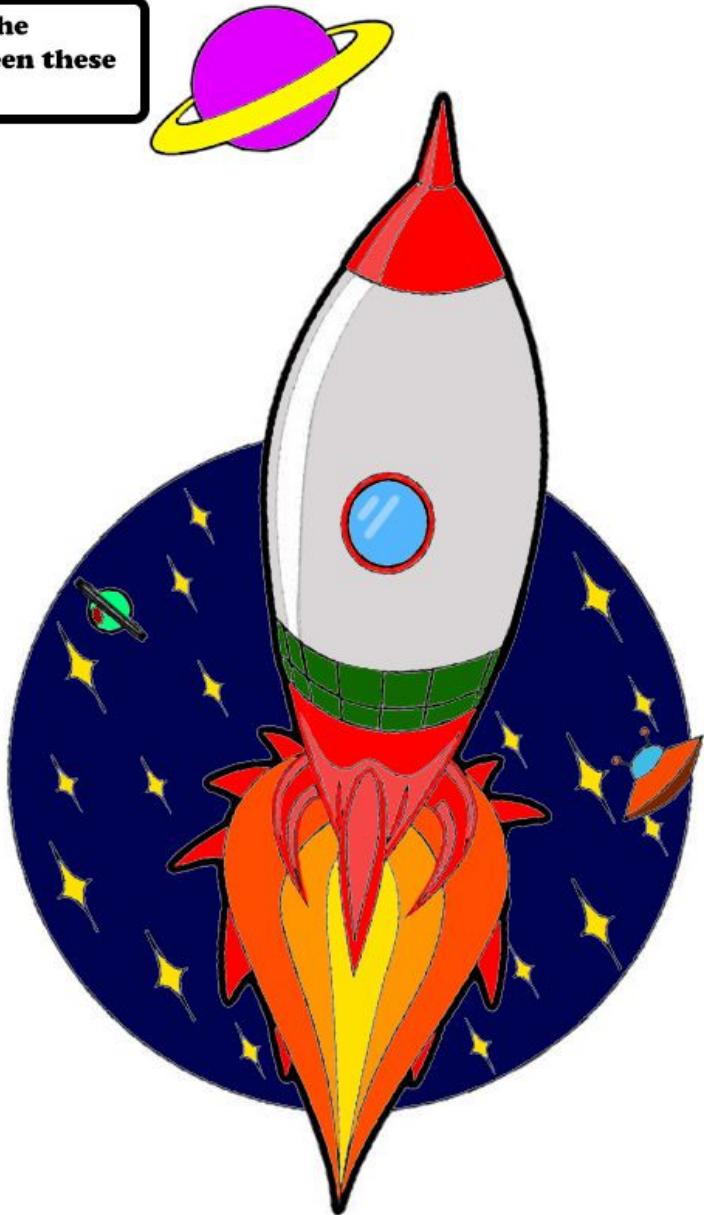

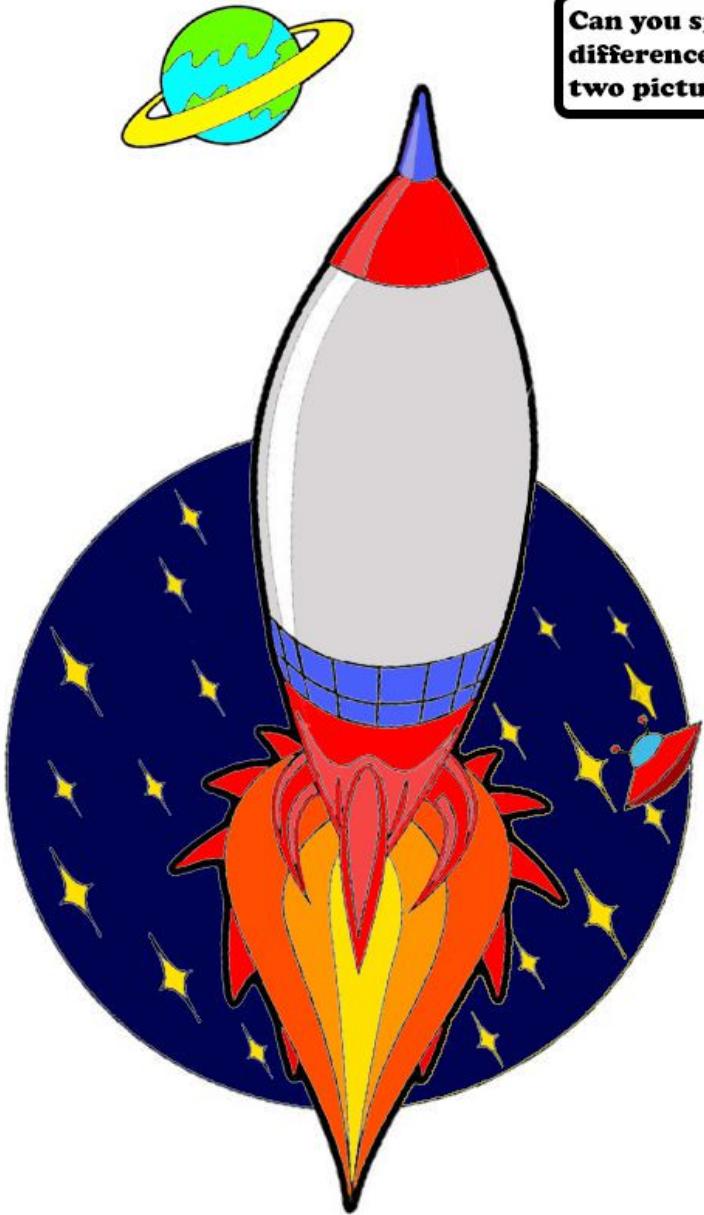

Find The Route

Help the astronauts on the rocket get back to Earth.
Find the correct route that the rocket should take.

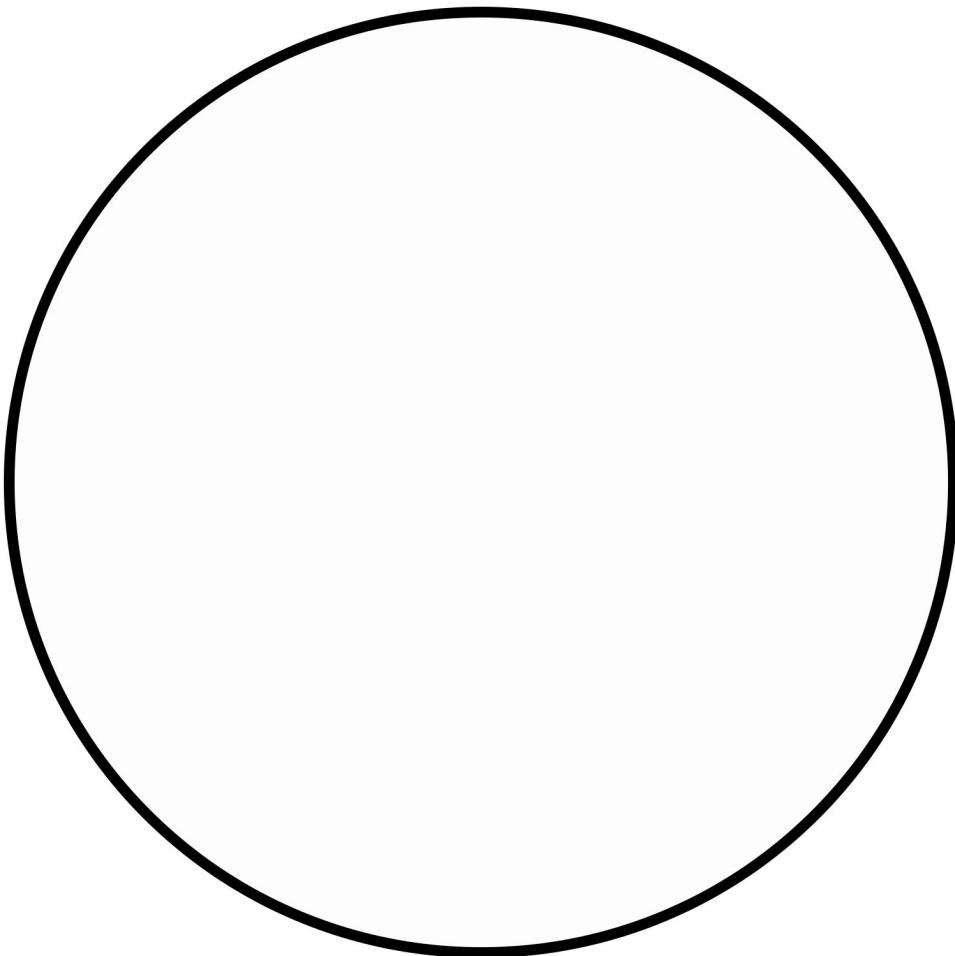

Spot The Difference

Can you spot all the differences between these two pictures?

Design Your Own Planet

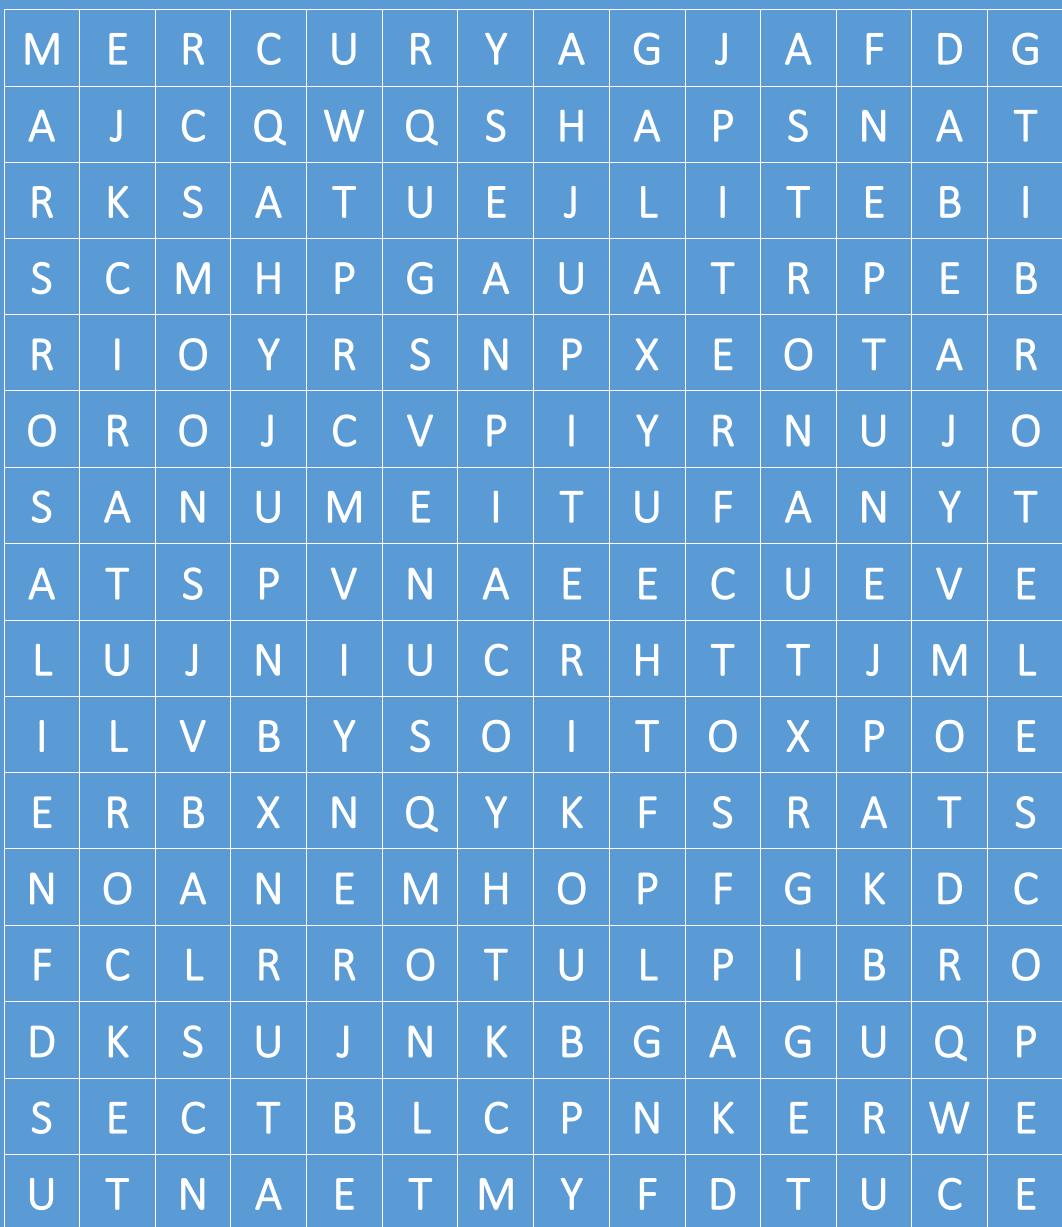

Did you know that there are over 100,000,000,000 (1 Billion) planets in our galaxy? That's a lot. Create your own planet with whatever colours you want. Will it be a gas or solid planet? Are there oceans on the planet? Get creative with your planet.

**What species lives
on this planet?
Draw the beings
that live on this
planet.**
